**DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-A 54-60366 (cited on IDS).

The reference in Figure 5 shows a foam article used for cushioning with different density regions separated by a series of through holes formed by pins that are removed after the foam has been partially cured.

3. Claims 1 and 5 are allowed.

The closest prior art is newly cited Kern et al., which shows flash from a weld seam that is concealed in the bottom of a recess formed by two rims of a tank wall. The reference does not teach an in-mold foam molding with the flash in a recess

between two different sections using different bead starting materials as is instantly claimed in claim 1.

4. Claims 3-4 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The claims have allowable subject matter for the reasons given in the above section.
